EYASU KERIE

IT Administrator | End-User & Technical Support

Addis Ababa, Ethiopia | +251 991 885 997 | eyasukerie@gmail.com | GitHub | LinkedIn

PROFILE

Electrical and Computer Engineering graduate (Computer Stream) with hands-on IT support and network administration exposure gained through an internship at Ethiopia's Information Network Security Administration (INSA). Comfortable troubleshooting hardware, software, and basic network/access issues, with a strong foundation in operating systems, databases, and application support built through coursework and independent full-stack projects. Detail-oriented and structured in approach, having worked within a high-responsibility national data program that demanded accuracy, documentation discipline, and adherence to process. Strong communicator with a customer-service mindset, eager to apply and grow technical support and administration skills in a fast-paced IT environment.

TECHNICAL SKILLS

- **End-User & Systems Support:** Windows OS troubleshooting, hardware/software issue resolution, application installation & updates, antivirus/security hygiene practices
- **Networking & Security:** LAN/WAN fundamentals, network administration and security basics (INSA internship), computer networks coursework
- **Databases & Data Management:** MySQL, MongoDB; large-scale data entry and integrity management (National ID Program)
- **Programming & Web:** JavaScript, React, Next.js, HTML/CSS, basic Python — useful for understanding and supporting application-level issues
- **Professional & Transferable:** Customer service orientation, task prioritization, technical documentation, attention to detail, clear written/verbal communication, adaptability under multiple assignments

INTERNSHIP & PRACTICAL EXPERIENCE

Network and Computer Engineering Intern — *Information Network Security Administration (INSA)*

- Supported network administration and troubleshooting tasks within a national security institution, gaining practical exposure to end-user connectivity issues and basic access problems.
- Applied security fundamentals to safeguard systems and data, building awareness of security hygiene practices later relevant to end-user protection and antivirus management.
- Worked within a structured, high-responsibility government institution, developing discipline in following procedures and escalating issues appropriately.

Data Encoder — *National ID Program, Ethiopia*

- Accurately entered and managed large volumes of citizen data for a national-scale digital identity initiative, strengthening data integrity and attention-to-detail skills directly relevant to IT asset and record management.
- Maintained consistent documentation standards while working within tight process and quality-control requirements, comparable to ticketing/documentation discipline in IT support environments.

RELEVANT TECHNICAL PROJECTS

- **Library Management System:** Built and deployed a full-stack application (React/Tailwind, Node.js/Express, PostgreSQL/Prisma, Docker), gaining practical experience installing, configuring, and troubleshooting multi-component software environments — directly transferable to application support and deployment tasks.
- **QuickCart & Hotel Management System:** Designed and built database-backed applications, applying database design and administration principles relevant to supporting business-critical systems.

EDUCATION

College of Technology and Built Environment (CTBE), Addis Ababa University 2026

Bachelor of Science in Electrical and Computer Engineering (Computer Stream) — CGPA: 3.68, Great Distinction

- Relevant Coursework: Computer Networks, Database Systems, Software Engineering, Embedded Systems, Web and Application Development
