Hiring Team, Human Resources

Ahadu Bank

Re: Application for IT Trainee Position

Dear Hiring Manager,

I am writing to apply for the IT Trainee position at Ahadu Bank. I recently graduated with a Bachelor of Science in Electrical and Computer Engineering (Computer Stream) from the College of Technology and Built Environment, Addis Ababa University, with a CGPA of 3.68 (Great Distinction). I am confident that my technical foundation, hands-on IT support experience, and disciplined approach to process and documentation make me a strong fit for this role.

During my internship at Ethiopia's Information Network Security Administration (INSA), I supported network administration and troubleshooting tasks, gaining practical exposure to end-user connectivity and access issues while building a solid awareness of security hygiene practices. This experience, combined with my coursework in Computer Networks and Database Systems, gave me a working understanding of the infrastructure and support challenges typical of a banking IT environment. I also worked as a Data Encoder on Ethiopia's National ID Program, where I managed large volumes of sensitive citizen data under strict accuracy and documentation requirements — an experience that sharpened my attention to detail and reinforced the importance of process discipline when handling critical information, both qualities I understand to be essential in banking operations.

Beyond my internship and data management experience, I have built practical technical skills through independent full-stack projects, including a Library Management System (React, Node.js/Express, PostgreSQL, Docker) that required me to install, configure, and troubleshoot multi-component software environments. I am comfortable with Windows OS troubleshooting, application installation and support, and databases such as MySQL, MongoDB, and PostgreSQL, and I am eager to build deeper expertise in banking systems and IT operations through Ahadu Bank's trainee program.

I would welcome the opportunity to bring my technical foundation, customer-service mindset, and strong work discipline to Ahadu Bank as an IT Trainee. Thank you for considering my application. I have attached my CV for your review and look forward to the possibility of discussing how I can contribute to your team.

Sincerely,

Eyasu Kerie

EYASU KERIE

IT Trainee Candidate | End-User & Technical Support

Addis Ababa, Ethiopia | +251 991 885 997 | Email | GitHub | LinkedIn | Portfolio

PROFILE

Electrical and Computer Engineering graduate (Computer Stream) from Addis Ababa University with hands-on IT support and network administration exposure gained through an internship at Ethiopia's Information Network Security Administration (INSA). Solid foundation in operating systems, databases, networking, and application support, built through coursework and independent full-stack projects. Experienced working within a high-responsibility national institution (National ID Program) that demanded accuracy, documentation discipline, and adherence to process — qualities well suited to a structured banking IT environment. Strong communicator with a customer-service mindset, eager to grow as an IT Trainee and build a long-term career in banking technology.

TECHNICAL SKILLS

- End-User & Systems Support: Windows OS troubleshooting, hardware/software issue resolution, application installation & updates, antivirus/security hygiene practices
- Networking & Security: LAN/WAN fundamentals, network administration and security basics (INSA internship), computer networks coursework
- Databases & Data Management: MySQL, MongoDB, PostgreSQL; large-scale data entry and integrity management (National ID Program)
- Programming & Web: JavaScript, React, Next.js, HTML/CSS, basic Python — useful for understanding and supporting application-level issues
- Professional & Transferable: Customer service orientation, task prioritization, technical documentation, attention to detail, confidentiality with sensitive data, clear written/verbal communication, adaptability under multiple assignments

INTERNSHIP & PRACTICAL EXPERIENCE

Network and Computer Engineering Intern *Information Network Security Administration (INSA)*

- Supported network administration and troubleshooting tasks within a national security institution, gaining practical exposure to end-user connectivity issues and basic access problems.
- Applied security fundamentals to safeguard systems and data, building awareness of security hygiene practices relevant to protecting banking systems and customer information.
- Worked within a structured, high-responsibility government institution, developing discipline in following procedures and escalating issues appropriately.

Data Encoder *National ID Program, Ethiopia*

- Accurately entered and managed large volumes of citizen data for a national-scale digital identity initiative, strengthening data integrity and attention-to-detail skills directly relevant to core banking data and record management.
- Maintained consistent documentation standards while working within tight process and quality-control requirements, comparable to ticketing/documentation discipline in IT support environments.

RELEVANT TECHNICAL PROJECTS

- Library Management System: Built and deployed a full-stack application (React/Tailwind, Node.js/Express, PostgreSQL/Prisma, Docker), gaining practical experience installing, configuring, and troubleshooting multi-component software environments — directly transferable to application support and deployment tasks.
- QuickCart & Hotel Management System: Designed and built database-backed applications, applying database design and administration principles relevant to supporting business-critical systems such as core banking platforms.

EDUCATION

Bachelor of Science in Electrical and Computer Engineering (Computer Stream) *2026*

College of Technology and Built Environment (CTBE), Addis Ababa University — CGPA: 3.68, Great Distinction

- Relevant Coursework: Computer Networks, Database Systems, Software Engineering, Embedded Systems, Web and Application Development

አዲስ አበባ ዩኒቨርሲቲ
